

MATEEN SOLEH CO.

Strength in Every Corner...

Company Profile

www.mateensoleh.com

About us

Maten Soleh General Contracting Ltd. has been at the forefront of steel construction excellence since our foundation in **2008**, building upon decades of industry expertise that traces back to 1990. Under the visionary leadership of General Manager **Khanolbrahim Muhammad**, our people-powered business has established itself as a trusted partner for durable, long-lasting custom-engineered metal and steel building construction throughout Iraq and the Kurdistan Region.

Licensed by the Kurdistan Regional Government and Erbil Companies Directorate, we have grown from humble beginnings to become a comprehensive steel construction powerhouse. Our state-of-the-art manufacturing facility spans **7,000** square meters and houses modern cutting-edge machinery for cutting, shaping, and automatic electric welding, enabling us to create exceptional metalwork and steel-framed construction projects.

Mission

To deliver exceptional custom-engineered steel and metal construction solutions that exceed client expectations through innovative design, superior craftsmanship, and unwavering commitment to quality. We strive to build lasting structures that serve communities while fostering long-term partnerships based on trust, reliability, and professional excellence.

Vision

To be the leading steel construction company in Iraq and the Kurdistan Region, recognized for our engineering innovation, manufacturing excellence, and contribution to infrastructure development. We envision a future where Maten Soleh's structures stand as monuments to quality craftsmanship, supporting the growth and prosperity of the communities we serve for generations to come.

With the capacity to manufacture up to **10,000** tons of metal annually, we have consistently delivered impressive results including our notable 2013 achievement of producing **6,000** tons of metal for a **300,000** square meter hall project. Our expertise extends beyond manufacturing to include strategic import operations, bringing quality steel frames and beams to domestic markets and distributing throughout southern and central Iraq.

Capacity to
Manufacture

+10,000

tons of metal annually

ARMAN Factory | Our Manufacturing Division

ARMAN Factory operates as our dedicated steel manufacturing division, serving as the industrial heart of Maten Soleh's production capabilities. This integrated facility represents our commitment to controlling every aspect of the steel construction process, from raw material processing to finished structural components.

Our company owns **17 groups** of designers

01 Constructing steel hall, with three types of truss, beam and steel frame and covering by corrugated steel plate or sandwich panel.

02 Constructing exhibition halls

03 Constructing multi-floor residency building by hollow core slabs

04 Constructing city gates

05 Constructing pedestrian bridge
